# Anunay Choudhury

Senior Engineer at Samsung Ads | Golang | Distributed Systems |  
Building scalable AdTech Systems  
Greater Bengaluru Area

## Summary

Backend Engineer with close to 3 years of experience building scalable backend systems and distributed applications, currently working on Samsung Ads. My work primarily focuses on Golang, microservices, distributed systems, Kafka, Kubernetes, Redis, and cloud-native infrastructure. I enjoy designing reliable systems, building high-throughput backend services, and solving scaling problems involving concurrency, consistency, and system reliability. At Samsung Ads, I have worked on: • Building backend systems from scratch for order management workflows • Designing asynchronous systems using Kafka and event-driven architectures • Improving deployment reliability using Kubernetes, Docker, Helm, and CI/CD pipelines • Building monitoring and observability systems using Grafana and metrics platforms • Solving distributed systems problems involving concurrency control and data consistency Outside work, I actively practice system design and competitive programming with 900+ problems solved across coding platforms. Always interested in backend engineering, distributed systems, and large-scale system design.

## Experience

### Samsung Ads

3 years

#### Senior Engineer

April 2025 - Present (1 year 4 months)

Bengaluru

#### Software Engineer

August 2023 - March 2025 (1 year 8 months)

Bengaluru

### Samsung R&D Institute India

Software Engineer Intern

June 2022 - August 2022 (3 months)

Bengaluru

---

## Education

Jadavpur University

Bachelor of Engineering - BE, Electronics and Instrumentation

Engineering · (August 2019 - July 2023)

Kalyani University Experimental High School

Class 12th (WBCHSE) · (2017 - 2019)

Kalyani University Experimental High School

Class 10th (WBBSE) · (2011 - 2017)
